Automatic Number Plate Recognition System

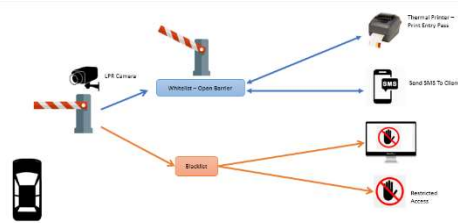

WHITE LIST

For residential assignment, all residents should register their vehicle into the system.

PREREGISTRATION

Host is able to pre register for his/ her visitor if the appointment has been confirmed.

VEHICLE ONSITE REPORT

Security Officer is able to retrieve the data based on condition to see outstayers within the premises.

Automatic Number Plate Recognition System (ANPR) provides a quick and easy way for registered vehcile to access into car parking facility. It will be generating drivers' details on the labe or the management can opt for SMS function. Cellular service is required.

For non-registered vehicle, security officer is required to register for the driver with a tablet given to record contact number and the destination. Once is entered, IVMS will register the driver into the system, barrier opens.

For cheking out, once the LPR camera captured the number plate, it will automatically checks out the driver that matches with the matched number plate record.
